

Practice B

For use with pages 34–42

Use a ruler to measure and redraw the line segment on a piece of paper. Then use construction tools to find the segment bisector.

- 
- 

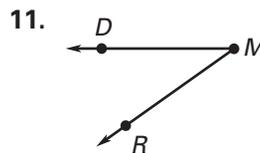

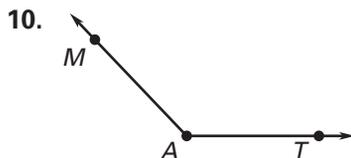

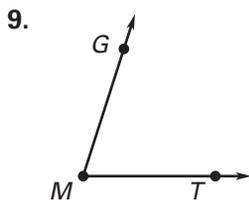

Find the coordinates of the midpoint of a segment with the given endpoints.

- $A(-3, 5)$
 $B(5, -1)$
- $C(-4, -3)$
 $D(6, 3)$
- $E(5, 0)$
 $F(-3, -5)$

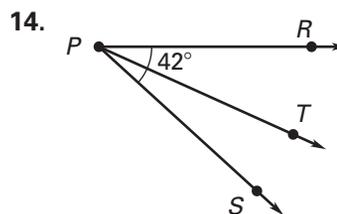

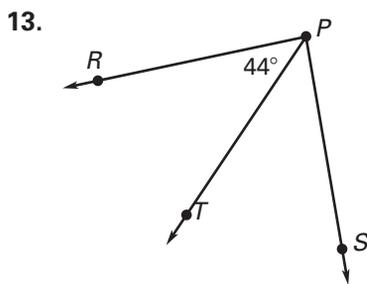

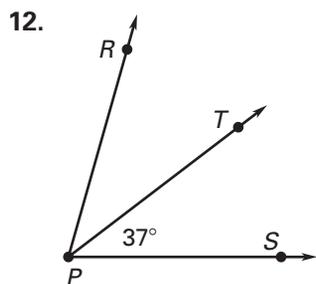

Find the coordinates of the other endpoint of the segment with the given endpoint and midpoint M .

- $T(6, 2)$
 $M(2, 0)$
- $A(-4, 3)$
 $M(-1, -1)$
- $P(7, 3)$
 $M(2, 1)$

Use a protractor to measure and redraw the angle on a piece of paper. Then use construction tools to find the angle bisector.

\overrightarrow{PT} is the angle bisector of $\angle RPS$. Find the two angle measures not given in the diagram.

\overrightarrow{BT} bisects $\angle ABC$. Find the value of x .
