

**Reteaching with Practice**

For use with pages 743–749

**GOAL****Use volume postulates and find the volume of prisms and cylinders****VOCABULARY**

The **volume of a solid** is the number of cubic units contained in its interior. Volume is measured in cubic units.

**Postulate 27 Volume of a Cube** The volume of a cube is the cube of the length of its side, or  $V = s^3$ .

**Postulate 28 Volume Congruence Postulate** If two polyhedra are congruent, then they have the same volume.

**Postulate 29 Volume Addition Postulate** The volume of a solid is the sum of the volumes of all its nonoverlapping parts.

**Theorem 12.6 Cavalieri's Principle** If two solids have the same height and the same cross-sectional area at every level, then they have the same volume.

**Theorem 12.7 Volume of a Prism** The volume  $V$  of a prism is  $V = Bh$ , where  $B$  is the area of a base and  $h$  is the height.

**Theorem 12.8 Volume of a Cylinder** The volume  $V$  of a cylinder is  $V = Bh = \pi r^2 h$ , where  $B$  is the area of a base,  $h$  is the height, and  $r$  is the radius of a base.

**EXAMPLE 1****Finding Volumes**

Find the volume of the right cylinder and the right prism.

**SOLUTION**

- a. The area  $B$  of the base is  $\pi \cdot 2^2$ , or  $4\pi \text{ in.}^2$ . Use  $h = 5$  to find the volume.

$$V = Bh = 4\pi(5) = 20\pi \approx 62.83 \text{ in.}^3$$

- b. The area  $B$  of the base is  $(7)(5)$ , or  $35 \text{ cm}^2$ . Use  $h = 3$  to find the volume.

$$V = Bh = (35)(3) = 105 \text{ cm}^3$$

## Reteaching with Practice

For use with pages 743–749

### Exercises for Example 1

Find the volume of the right prism or the right cylinder.

### EXAMPLE 2 Using Volumes

Use the measurements given to solve for  $x$ .

$$V = 60 \text{ cm}^3$$

### SOLUTION

The area of the base is  $3x$  square centimeters.

$$V = Bh \quad \text{Formula for volume of a right prism}$$

$$60 = (3x)(5) \quad \text{Substitute.}$$

$$60 = 15x \quad \text{Rewrite.}$$

$$\frac{60}{15} = x \quad \text{Divide each side by 15.}$$

$$4 = x \quad \text{Simplify.}$$

### Exercises for Example 2

Use the measurements given to solve for  $x$ .

4.  $V = 283 \text{ m}^3$

5.  $V = 64 \text{ in.}^3$

6.  $V = 300 \text{ ft}^3$
