

**Practice A**

For use with pages 396–402

**Name the transformation that maps the lighter checkered flag (preimage) onto the darker checkered flag (image).**

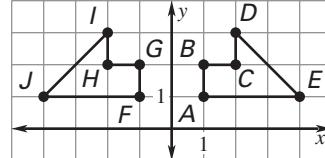

**Decide whether the transformation is an isometry. If it is, name the transformation. (Preimages are unshaded; images are shaded.)**

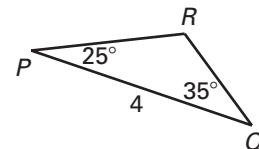

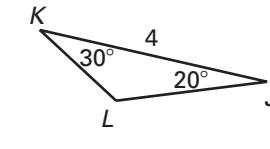

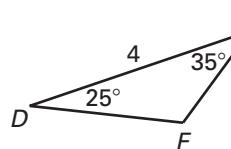

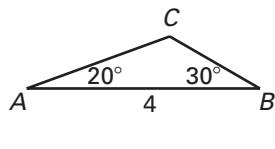

**Use the graph of the transformation below.  $ABCDE$  is the preimage.**

7. Figure  $ABCDE \rightarrow$  Figure \_\_\_\_\_.
8. Name and describe the transformation.
9. Name the image of  $\overline{CD}$ .
10. Name the preimage of  $\overline{FJ}$ .
11. Name the coordinates of the preimage of point  $I$ .
12. Show that  $\overline{DE}$  and  $\overline{IJ}$  have the same length, using the Distance Formula.

**Use the diagrams to complete the statement.**

13.  $\triangle ABC \rightarrow \triangle \underline{\hspace{2cm}} \underline{\hspace{2cm}} ?$

14.  $\triangle DEF \rightarrow \triangle \underline{\hspace{2cm}} \underline{\hspace{2cm}} ?$

15.  $\triangle \underline{\hspace{2cm}} \underline{\hspace{2cm}} ? \rightarrow \triangle ACB$

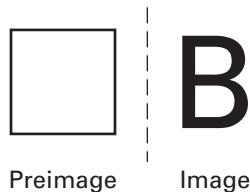

16.  $\triangle \underline{\hspace{2cm}} \underline{\hspace{2cm}} ? \rightarrow \triangle CBA$

17.  $\triangle RQP \rightarrow \triangle \underline{\hspace{2cm}} \underline{\hspace{2cm}} ?$

18.  $\triangle \underline{\hspace{2cm}} \underline{\hspace{2cm}} ? \rightarrow \triangle EFD$

**Sketch the preimage if the image was transformed by the following.**

19. Reflection

20. Rotation of  $180^\circ$  clockwise

21. A non-rigid transformation
